BLOODED HORSES TO BE JUDGED TOMORROW

Percheron and French Coach
Classes Tomorrow and Single
Driving and Saddle Horses
Before Stand Thursday.

The first horse show to be held in Albuquerque will begin tomorrow with the judging of entries in the Percheron and French coach classes of which there are a number of entries. A. L. Martin, superintendent of the department of horses and mules, has chosen the judges and completed arrangements for the judging tomorrow. Thursday afternoon the single driving and saddle classes will be judged before the grandstand. In the saddle class especially the entries are of a high grade and the display promises to be interesting. Friday afternoon work and general purpose animals will be judged.

Victor Saks of Albuquerque has entered his station "Teddy" in the Percheron competition and Rishy & Bowers of Davis, Cal., have three entries in this class, Grenadier, Flit and Prince. The California men also have two entries in the German and French coach class. The Albuquerque Horse Breeders' association has entered its horse Amour in this class and Dr. A. E. Graham of Batson has entered Ulmild among the coaches. Owners must ride in the saddle class judging Thursday afternoon, which is expected to add materially to the interest.

It is a gentle, soothing balsam,
penetrates to the fine network of nerves
beneath the skin and has a marked
tendency to relieve the muscular strain
to which these broad, flat abdominal
muscles are subjected. The cords, ten-
dons and ligaments of the abdomen contract
without the corresponding muscular
strain so often involved during the period
of expectation. And particularly to young
mothers is this remedial application of
inestimable value since in thus keeping
the muscles firm but pliant it enables
them to go through the various contractions
of the uterus often the case

MOTHER OF SCHOOL GIRL

Tells How Lydia E. Pinkham's
Vegetable Compound Re-
stored Her Daugh-
ter's Health.

Plover, Iowa.—"From a small child
my 13 year old daughter had female
weakness. I spoke to three doctors
about it and they did not help her any. Lydia E. Pinkham's
Vegetable Compound had been of
great benefit to me, so I decided to have
her give it a trial. She has taken five
bottles of the Vegetable Compound and
she is cured of this trouble. She was so poorly and weak that I often had to help her dress
herself, but now she is regular and is
growing strong and healthy." —Mrs.
MARTIN HELVIG, Plover, Iowa.

Hundreds of such letters expressing
gratitude for the good Lydia E. Pinkham's
Vegetable Compound have been
constantly being received, proving the reliability of this grand old
remedy.

If you are ill do not drag along and
continue to suffer day in and day out but
at once take Lydia E. Pinkham's Vegetable
Compound, a woman's remedy for
woman's ills.

If you want special advice write to
Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be
opened, read and answered by a
woman and held in strict confidence.

DEAFNESS CANNOT BE CURED

by local applications as they cannot

reach the diseased portion of the ear.

There is only one way to cure deaf-

ness, and that is by constitutional

remedies. Deafness is caused by an

inflamed condition of the mucous lining

of the Eustachian tube. When this tube is inflamed you have a runny, sour or imperfect hearing,

and when it is entirely closed, Deafness

is the result, and unless the inflam-

mation can be taken out and this tube

restored to its normal condition,

hearing will be destroyed forever;

most cases out of ten are caused by

Catarrh, which is nothing but an inflamed

condition of the mucous surfaces.

We will give One Hundred Dollars

for any case of Deafness caused by

Catarrh that cannot be cured by

Hall's Catarrh Cure. Send for cat-

cure, free.

THE NEW CITY MAP NOW READY FOR DELIVERY

William L. Staley Has Expended
Over \$700, Besides His
Time, in Preparing Splendid
New Map.

The long-felt need of a new up-to-date map of our city has at last been filled through the efforts of William L. Staley, the local civil and engineering engineer.

Instead of being the ordinary country town type of an abstracting map the new one fits all purposes of a map, except for abstracting, and presents many new and original features heretofore unused, and which make it the most artistic and beautiful picture ever produced of any city, and at the same time the most comprehensive and useful map procurable.

The public-spiritedness of Mr. Staley is shown in the fact that the churches, schools and all other public buildings are classified in a most attractive manner, and it must be remembered that he expects no financial returns from these places.

The new maps of the Santa Fe are shown in detail just as they will be when completed, which together with showing the other industrial plants makes a great advertising feature of our resources.

The map is a combination map and business directory, for each business house is named on the lot when it occupies. This in connection with its many other distinctive features makes the map one of the greatest advertising mediums possible of being used for any city, and if properly distributed over the entire country will certainly bring home a rich harvest to Albuquerque.

The map is not an imposition on an un-needed article for every city needs a new map each few years and this kind of a map is useful in each and every business and home and should be mailed throughout the country.

Mr. Staley has simply mailed off

the good business judgment of our

citizens and on their gold civic pride

by placing several months of very

hard work into the compilation and

drawing of this map and in the

spending of over \$600.00 for the

lithographing, printing and mounting

of the maps, as his only possible

means of getting this money back is

by selling the maps and this he is

doing at most reasonable prices.

He has advertised each and every

business in our city, in a way that it

will stand for many years, and each

business house should show its ap-

preciation by buying one of the

maps. They may be seen and had

by calling at room 2 of the Cromwell

building, or by phoning 361.

DEAN'S BUFF ORPINGTONS

Have been trying to boost the poultry industry in general, and S. C. Buff Orpingtons in particular, at the New Mexico State Fair for five years in succession. This is the fourth year the hen represented by this cut has been exhibited at Albuquerque. She is accompanied this season by three of her progeny—two cockerels and one pullet. They were hatched January 28, 1914, and the pullet began laying June 16, and is still laying nearly every day.
